- Worked With OS like Windows 10, 8, 7, and XP - Ubuntu Linux
- Experience in area of technical support of clients, work with technical support of other firms
- Knowledge in Firebase, Handle subscription event

DISSERTATION

Research Area: Image Processing
Leaf classification based on Image Processing

SOME PROJECT DETAILS

Project Name — HCTracker and EuroTech and Seriyeardim
Technology & Features:
- Web App, SignIn / SignUp Multiple Role,
- Add devices by manufacturer,
- Sell devices by one role to another role,
- Json Parsing,
- Multiple File Upload/Update,
- Material Design

Describe Tasks Link:
https://docs.google.com/document/d/1p5xrBD7lXrukwk8DaBIf4x525PnWfHQxVvsZWRE5rd4/edit
Live URL:
http://hctracker-app.s3-website-us-east-1.amazonaws.com/#/sign-in
Role: ReactJs Developer

Project Name — Jorganize
Technology & Features:
- Bootstrap Design,
- Chat,
- Send & receive friend request,
- Social login: Facebook, Google Sign In,
- File/video/audio etc upload/update
Role: Team Leader & Developer

Project Name — Unova
Technology & Features :
- Material Design,
- Implement Map view
- Add markers spider view
- Display origin route in map based on latlng
- Display orders time and details
Live URL :
http://unova-signup.s3-website.us-east-2.amazonaws.com/#/
Role : ReactJs Developer

Project Name — RinusWeb
Technology & Features:
- Material Design,
- SignIn, signup multiple role
- Create,update,remove branches using basic detail, opening hours detail,
services detail, employee detail using one form
- Add,upload,remove multiple services and employee details
- Admin booed any employe appointment using graph
- MySql, JWT
Live URL: https://rinusapp.com/#/
Role: ReactJs Developer / Backend Developer

Project Name — Farm365
Technology & Features :
- Multiple Language,
- Multi Step signup,
- Implement aws amplify for signup, forgot and reset password etc
- Implement barcode functionality for add products,
- Update theme(Light/Dark),
- Graph for selling devices details
- Create cloudformation
- Create serverless apis lamda with graphql, dynamodb

- CI/CD setup for run project in multiple aws account
Live URL: https://app.eyeoe.ch/
Role: Team Leader, Frontend/ Backend Developer

Project Name — Survaybooker
Technology & Features:
- Manage all surveybooker detail,
- Email template,
- Manage all for CRUD operation using stepper flow,
- Inline editing using view detail
Link: https://watsonssurveyors.surveybooker.co.uk/#/
Role: ReactJs Developer

Project Name — VReality
Technology & Features:
- Create one shop or tour
- Add hotspot for visite next section
- When click product hotspot customer easily purchase product
Ref links for make functionality:

https://kuula.co/help/floor-plan
Live URL: https://vreality.ipangram.com/#/
Role: ReactJs Developer

Project Name — Mindcentral
Technology & Features:
- Nodejs, Express, Mongodb database, Multer S3,
- Passport, SignIn/SignUp using social media
Live URL: https://mindcentral.com/#/
Role: NodeJs Developer

Project Name — Stockai
Technology & Features:
- Material ui design,
- Serverless apis,
- Manage all stock details
- Manage frontend based on typescript
Role: Team Leader
