Technical Skills

Primary Skills:

Frontend	Testing	Version Control	Project Management & Monitoring	API & Package Managers
React (5yr)**, Redux** (5yr)**, Hooks** (5yr)**, JavaScript** (6yr)	**Cypress** (3yr)	GitHub, GitLab	Jira, Confluence, Figma Grafana NewRelic	Postman, NPM

Secondary Skills:

DevOps	Backend	Database	UI	Authentication
Docker (1yr), Kubernetes (K8s) (1yr), Helm (1yr) YAML/JSON Scripting (1yr) Azure (1yr)	Node.js (3yr), Express.js (3yr), GraphQL(3yr), AWS Lambda (3yr) PHP(1yr)	MongoDB (3yr) MySQL (3yr) DynamoDB (3yr)	SCSS (3yr), Material UI (3yr), Bootstrap (3yr),	JWT, Social Logins (Google, Facebook) AWS Cognito

Professional Experience

Senior Software Engineer | Randstad Digital

Client: Walmart
Employment Type: Contract (Long-term)
Skills: React, JavaScript
Location: Bangalore, India
Duration: Mar 2025 – Jun 2025
Role & Responsibilities:

- Collaborated with frontend developers working on **React, Redux, JavaScript**
- Ensured quality through automated testing using **Cypress**.
- Participated **in Agile ceremonies** including **sprint planning**, **daily stand-ups**, and retrospectives.
- Worked closely with product, frontend, and QA teams to triage React-related bugs and ensure timely resolutions.

Senior Software Development Engineer | Bridgenext (Emtec)

Employment Type: Permanent
Skills: React, JavaScript
Location: Pune, India
Duration: Jun 2022 – Feb 2025
Role & Responsibilities:

- Built scalable frontend applications using **React**, **Redux**, **JavaScript**, and SCSS.
- Wrote custom Hooks and implemented reusable component patterns (**HOC components**).
- Integrated REST APIs via **Axios** and **Fetch** with complete error/loading state handling.
- Ensured quality through automated testing using **Cypress**.
- Contributed to DevOps activities using **Docker**, **Kubernetes** (K8s), **Helm**, **Argo CI/CD**, and **Azure**.
- Monitored clusters using **Grafana** and **NewRelic**, and **automated YAML/JSON updates via CLI scripts**
- Participated **in Agile ceremonies** including **sprint planning**, **daily stand-ups**, and retrospectives.
- Collaborated with cross-functional teams and followed Scrum methodology.

Software Developer | Sigma Solve Ltd

Employment Type: Permanent
Skills: React, Redux**,** JavaScript
Location: Ahmedabad, India
Duration: Jun 2021 – Jun 2022
Role & Responsibilities:

- Developed frontend applications using **React**, **Redux , JavaScript**.
- Managed form state and validations using custom **Hooks**.
- Integrated dynamic APIs for live content and built responsive UIs using **SCSS** and **Bootstrap**.
- Participated in client meetings and sprint reviews for feature finalization.

MERN Stack Developer | I-Pangram (Jack Solutions)

Employment Type: Permanent
Skills: React, Redux**,** JavaScript
Location: Surat, India
Duration: Jun 2019 – May 2021
Role & Responsibilities:

- Developed end-to-end applications using **React**, **Redux, JavaScript**, **Node.js**, **MongoDB**, and **GraphQL**.
- Implemented authentication/authorization with JWT and role-based access.
- Managed form state and validations using custom **Hooks**.
- Built features such as maps, dashboards, and dynamic forms with reusable UI components.
- Integrated REST APIs via **Axios** and **Fetch** and built responsive UIs using **Material UI**, **SCSS** and **Bootstrap**.

Software Developer | LAMP Technologies

Employment Type: Permanent
Location: Surat, India
Duration: Jun 2018 – May 2019
Role & Responsibilities:

- Started as a full-stack developer using PHP, **JavaScript**, **Node.js**, and **MySQL**.
- Created small-scale applications with dynamic modals, validations, and CRUD operations.
- Managed frontend styling using **Bootstrap**.

Education

MSc (IT), Uka Tarsadia University, Jul 2013 - Jun 2018 | CGPA: 6.92
HSC, Gujarat Secondary and Higher Secondary Education Board, Jun 2012 - Jun 2013 | 52.00% SSC,
Gujarat Secondary and Higher Secondary Education Board, Jun 2011 - Jun 2012 | 75.00%

Certifications

Spoken Tutorial certificate for completion of C/C++ Exam - 2014
National Aptitude Test Certificate (NCAT) - 2017
Bright Beginning Award - I pangram 2019
Appreciation - I-pangram 2021-06-03

Dissertation

Research Area: Image Processing - Leaf classification based on Image Processing

Project Highlights

Devops Engineer

1. **Build and Deployment Workflows**
   - Run, build and destroy workflows.
   - Debug failed jobs and attempt to resolve issues.
     - Based on Terraform commands or Azure settings.
     - If the job failure is complex, conduct a deep analysis.
2. **Collaboration**
   - Connect with the onshore team to understand the workflow and resolve issues.
3. **Kubernetes Cluster Management**
   - Check if pods are running properly based on the cluster and namespace.
4. **Helm Chart Management**
   - Update Helm chart versions for all existing projects.
   - Compare the old version with the latest one to analyze dependencies.
   - Create documentation for changes:
     - Mention side effects.
     - Highlight new features added.
   - After client approval, proceed with the Helm command for deployment.
5. **Automation and Scripting**
   - Created scripts to update YAML and JSON file values using command-line inputs.
     - Example: Update cpuRequest, memoryRequest, etc.
     - Modify values based on global settings.
     - Verify values using the Konductor command.

Frontend Engineer

Project Name — Mastermind

Purpose:

- Manage carrier, vendor, driver, booking, facilities based on stop, route and acquire, release, extend lock

Technology & Features:

- Manage modules using flag
- Massbooking functionality
- Manage validation using minion settings and we use all field with the existing reference
- UI: Done by another team
- Testcase: Cypress

Some Modules:

   Dashboard:

- **Route will manage with diff status (RLCS)**
  - Pending, Incomplete, Covered, Open, Dispatch
- **My matches**
- **Manage capacity based on:**
  - Assign driver, Book carrier, Driver validation, Bounced, Rebooking
- **Load**
- Manage order and stops detail
- Manage route based on order and stops detail
- Book carrier and vendor
- Bounce carrier

  Mass booking (Recently implemented)
- Select carrier
- Manage Route Information's with validations
  - Location, Date/time, equipment, length, cost details etc. information
  - RLCS open first
- Lock acquires, release, extend
- Book carrier on multiple selected route with validations based on minion settings

Role: Frontend Developer

Project Name — HCTracker and EuroTech and Seriyeardim

Technology & Features:

- Web App, Sign In / Sign Up Multiple Role,
- Add devices by manufacturer,
- Sell devices by one role to another role,
- Json Parsing,
- Multiple File Upload/Update,
- Material Design

Live URL: http://hctracker-app.s3-website-us-east-1.amazonaws.com/#/sign-in

Role: ReactJs Developer

Project Name — Jorganize

Technology & Features:

- Chat,
- Bootstrap design
- Send & receive friend request,
- Social login: Facebook, Google Sign In,
- File/video/audio etc upload/update

Role: ReactJs Developer

Project Name — Unova

Technology & Features :

- Material Design,
- Implement Map view
- Add markers spider view on map
- Display origin route in map based on latlng
- Display orders time and details

Live URL : http://unova-signup.s3-website.us-east-2.amazonaws.com/#/

Role : ReactJs Developer

Project Name — RinusWeb

Technology & Features :

- Used Material UI
- Sign In, signup multiple role
- Create, update, remove branches using basic detail, opening hours detail, services detail, employee detail using one form

- Add, upload, remove multiple services and employee details
- Admin booked any employee appointment using graph

Live URL: https://rinusapp.com/#/

Role: ReactJs Developer

Project Name — Survaybooker

Technology & Features:

- Manage all survey booker detail,
- Email template,
- Manage all for CRUD operation using stepper flow,
- Inline editing using view detail

Link: https://watsonssurveyors.surveybooker.co.uk/#/

Role: ReactJs Developer

Project Name — VReality

Technology & Features:

- Create one shop or tour
- Add hotspot for visit next section
- When click product hotspot customer easily purchase product Ref links for make functionality:

https://www.marzipano.net/demos.html https://kuula.co/help/floor-plan

Live URL: https://vreality.ipangram.com/#/

Role: ReactJs Developer

Frontend / Backend Engineer

Project Name — Farm365

Technology & Features :

- Multiple Language,
- Multi Step signup,
- Implement aws amplify for signup, forgot and reset password etc
- Implement barcode functionality for add products,
- Update theme(Light/Dark),
- Graph for selling devices details
- Create cloudformation
- Create serverless apis lambda with graphql, dynamodb
- CI/CD setup for run project in multiple aws account

Live URL: https://app.eyeoe.ch/

Role: Frontend/ Backend Developer

Project Name — Stockai

Technology & Features :

- Material ui design,
- Serverless apis,
- Manage all stock details
- Manage frontend based on typescript

Role: Frontend/ Backend Developer
